

Service Catalog V3

Background Color	Description
	Candidate to merge or shut down
	Still, exists?
	Merge

Scope (Brand /Common)	Service Name	Description / Summary	Service Type (Container / Container Task / Lambda)	.NET version	Maintenance (Janitor)	Monitoring (Prometheus)	TF v2	K8S ready
CONTAINER SERVICES								
brand	addecision	Sends VMAP data to MediaTailor to splice video manifest with advertisements.	Container	3.1	no	no	yes	
brand	appchangenotifier	Sends cache invalidation notifications.	Container	3.1	no	no	yes	
brand	appmodelmanagement	Performs CRUD functionality for catalogs, data groups, and feeds.	Container	7.0	yes	no	yes	y
brand	asset management	Manages S3 file access rights lease.	Container	3.1	no	no	yes	
brand	authz	Performs playback authorization for the applications.	Container	3.1	no	yes	yes	
brand	collections	Manages collections and relationships, responsible for custom bookmarks and discussion board.	Container	3.1	yes	no	yes	y
brand	communication?	Pushes endpoint registration and messaging.	Container	3.1	no	no	yes	
brand	concurrent streams-queue processor	Process playback status updates to decide if the device should stop playing.	Container	6.0	yes	no	????	
brand	confcat	Design and public service endpoints, provide application layout.	Container	7.0	no	yes	-	
brand	consumption	Reports content consumption.	Container	3.1	no	no	-	
brand	content	Filters content and provides content details.	Container	7.0	no	yes	-	
brand	contentgraph	Single point of truth of content, artist, etc., objects toward application services (property bag translation). It also returns customer-specific lists (likes, watchlist, follow, etc.) and provides search via CloudSearch integration.	Container	3.1	yes	no	-	
brand	contentmanagement	Manages content management; Transcode trigger.	Container	7.0	yes	no	yes	y
brand	countrymanagement	Manages CRUD functionality for countries and regions (parental control ratings).	Container	3.1	no	no	yes	
brand	customer	Manages configuration parameters.	Container	6.0	yes	no	yes	yes
brand	identity-service-adapter		Container	3.1	no	yes	?	
brand	imageprocessor	Does image manipulation (resize, crop, blur, etc.) and QR code rendering.	Container	6.0	yes	no	yes	
brand	jobmanager	Manages jobs.	Container	6.0	no	no	?	

brand	markermanagement	Manages various markers (e.g.: Intro, Credits) and insertion points (e.g.: Advertisement).	Container	6.0	yes	no	yes	y
brand	mediahelper	Manages AuthGroups, PlaybackPolicies, SKUs, and MediaProfiles.	Container	6.0	yes		yes	
brand	message broadcaster	Coordinates content update pipeline.	Container	3.1	no	no	-	
brand	messagecenter	Receives & enqueues notification events and configures notification template & behavior for app events.	Container	3.1	yes	no	yes	
brand	messagecenter-queueprocessor	Sends notifications upon various events.	Container	3.1	no	no	?	
brand	shootout	Custom push messaging & device message relay.	Container	6.0	no	no	yes	
brand	stringsmanagement	Does CRUD functionality for (app) localization strings	Container	3.1	no	no	yes	
brand	vouchermanagement	Does voucher Campaign management.	Container	3.1	no	no	yes	
brand	recommend	Provides personal recommendations and maintains recommendation models.	Container	6.0	yes		yes	
brand	reporting	Reporting Service	Container	6.0	no		yes	
brand	reward	Rewards and PurchaseOrder service	Container	7.0	yes			
COMMON SERVICES								
common	audit	User activity logging and reporting.	Container	6.0	no	no		
common	brand management	Does brand management, AWS marketplace interop, and usage reporting.	Container	6.0	yes	no		
common	parameterstore	Manages configuration parameters	Container	6.0	yes	no		
CONTAINER TASKS								
brand	media-processor	Performs media post-processing tasks: <ul style="list-style-type: none"> • Chime import • IVS import • Remix audio • Trim/Cut Media 	Container Task	6.0	no	no		
brand	recommend-dataprocessor	Periodically creates new datafiles about customers, contents, and sessions (in AWS Personalize terminology: users, items, and interactions, respectively).	Container Task	6.0	no			
brand	reporting-processor	Processes the Athena database via SQL queries.	Container Task	6.0	no			
JOB LAMBDA								
brand	job-archive media-initializer		Lambda	3.1	N/A	N/A		
brand	job-contentexport-initializer		Lambda	6.0	N/A	N/A		
brand	job-contentmaintenance-initializer		Lambda	6.0	N/A	N/A		
brand	job-decisionmaking-initializer		Lambda	3.1	N/A	N/A		
brand	job-edit-tag-initializer		Lambda	3.1	N/A	N/A		
brand	job-mintnft-initializer		Lambda	3.1	N/A	N/A		
brand	job-notification-initializer		Lambda	3.1	N/A	N/A
